

### **To All Addus Caregivers:**

As the country works through this recent up tic in COVID cases, we suspect that communities or even states might resort to some form of shut down, similar to what was experienced during the onset of COVID.

As essential workers, we wanted to remind you of the safe passage letters found in the Caregiver Resource Center, in the event you are ever stopped and need one. Make a copy of the letter pertaining to your line of business and carry it with you. If you do not have the availability to make a copy, please contact your branch for a copy.

Please go over the documents found in the Caregiver Resource Center to review the proper use of personal protective equipment (PPE), and the associated policies designed to keep you and your clients safe.

Carrying out the Addus mission of keeping people in their homes has never been more important than in this day and time. Your service means so much to the most vulnerable in our communities, and Addus Leadership thanks you for your tireless dedication.
